massage therapy

Excellence in Massage Therapy

“Massage excellence comes from training and experience. Every one of our massage therapists have well above average qualifications, with a thorough knowledge of human anatomy. And with years of practice skills our massage therapists work to provide you with a choice of *relaxation*, *relief* or *revitalising* massages.

Your massage is unique to you. Our therapists work with the needs of your body as well as your wishes to give you the perfect balance of therapy anytime of the day!”

Vispi Jamooji, Clinic Manager

Treatments are carried out in a calm room where you can switch off. Relax with soft lighting and warm towels, or enjoy a powerful deep-tissue massage with advice and health tips. Choose from over 10 different massages and feel better today, this evening or this weekend.

Relaxation Relief Healing

Relaxation and Healing

By working on certain pressure points or using gentle stretches our massage therapists know how to make massage relaxing. They also work closely with osteopathy patients, so have good insight into managing simple aches & pains for you.

Caring Massage Practitioners

We have genuinely lovely and caring therapists. You will find they take an interest in your needs and can offer advice on a wide range of issues, from women's health to sports therapy. Our massages are more than just a massage, we work hard to help you with your goals.
